GUIDELINES FOR USING ARTIFICIAL INTELLIGENCE

OTL SIDE

AI can help you learn and get new ideas, but you need to use it the right way. Always try your best, follow the rules, and tell your teacher if AI helped you.

Do Your Best First — 1
Try by yourself before asking AI for help. Ask an adult to help you use AI.

Check Your Answers — 2
AI might get things wrong. Always think and check!

Keep Your Info Safe — 3
Never tell AI your name, school, other personal details. Don't upload your photo to AI.

Follow the Rules — 4
If your teacher says, "no AI," don't use it. Always ask first!

Keep Learning — 5
AI is a helper, but your brain does the real learning.

Be Honest — 6
If AI helps you, tell your teacher or write it at the bottom of your work.

Be Kind — 7
Don't use AI to spread lies or be mean to others. Think before you share.
